

# RAJESHWARI KARUNA SCHOOL TULI NEWSLETTER

HALF YEARLY | VOLUME 1 | ISSUE 2 | 2021

Esteemed Readers

Greetings from Rajeshwari Karuna family. It is with tremendous pleasure and excitement that we bring to you the second edition of our half yearly newsletter. We bring to you a glimpse of the life at Rajeshwari Karuna School and hope that you will be as blessed to see the growth and development of our children as we are of them. It is indeed an honor to be a part of a child's growth and development and we believe that through this newsletter we reach out to one and all to be a part of our children's life.

Do continue to support and encourage our children by subscribing to this newsletter. Happy Reading.

Regards  
Amenla Jamir  
Principal, RKS Tuli.

## *"A Dream"*

A dream I have been chasing for many years.  
A little different from others,  
A little harder from others,  
Wishing every shooting star in the night sky.  
Imagining it every night lying in my bed.  
Praying to God every morning.  
Chasing it every day,  
Waiting to grab it soon.  
Seeing my destination far away  
from where I stand,  
Still shining in the highest peak.  
Many miles to walk,  
Many rivers to cross,  
Many storms to face  
Many mountains to climb.  
Feeling the time go by,  
I am still doing my best,  
Hoping to achieve it soon  
A dream that I have been chasing  
for many years.

Composed by  
Akumsenla  
Grade-9

*"The every little magical moment like  
I breathe and can play around is all  
miracles."*

Composed by  
Sorangepem  
Grade-1

## VOCATIONAL ACTIVITIES

### MUSHROOM CULTIVATION

The adoption of mushroom cultivation provides additional learning program for the students in nurturing a self-sufficient attitude.

### ORGANIC GARDENING

The RKS organic garden teaches fundamental lessons about biology, food, nutrition and provides children first hand experience with nature and gardening. Apart from practical skills in agriculture and horticulture, gardens are a living laboratory for the study of environmental issues and life sciences.

### CRASH COURSE ON COMPUTER APPLICATION FOR TEACHERS

With the growing advancement in technology and the need for technological knowledge, the teachers were given a two-day crash course on Computer Application to make teaching-learning process a more convenient platform for both teachers and students.

## RECREATIONAL ACTIVITIES

### RETREAT

The school with the objective to promote and maintain healthy and happy relationship among the community, a three-day retreat program was organized with the theme "Breaking Bad, Building Good", which was led by Rev. Dharambir and his family.

### CAMPING

Students of Grade-9 were taken on a three-day camping cum trekking to Kangtsung Yimsen, with the objective to help them learn and understand the beauty of nature, build team spirit, to acquaint them with different traditional ways of making utensils and cooking using bamboo, and also to promote cultural values

## "Education and Pandemic"

How important education is!  
 Knowledge is what we get...  
 Wisdom is what we acquire  
 We are upgraded to a better person  
 Education never fail to mould us  
 And oh! There came pandemic  
 The system changed  
 But education never changed  
 Continuously molding us  
 Unfortunately...  
 Pandemic brought addiction with it.  
 Every child in the household forgot  
 The love of their elders  
 The love for gadgets became so deep  
 Sunrise or sunset  
 They don't know anymore  
 Education and pandemic is like a mixed feeling now  
 But remember...  
 Pandemic makes us lazy and dull  
 Education upgrades us into smarter beings each passing days.

Jansitila L.K.R  
 Grade 8

## "MY CAMPING EXPERIENCE"

The three-day camping trip to Kangtsung Yimsen was an absolutely delightful experience. The days were filled with laughter and joy, as we had the opportunity to learn different aspects of life like teamwork and work ethics. It was also very educational as we learned about many indigenous things such as making bamboo spoons, cup holders among many other things. We were taught how to cook rice in bamboo and I also had the chance to learn how to pitch a tent. We also went to a reserved forest where the roads were supposedly used by our forefathers to trade with Assam. Overall, it was a splendid experience.

Takosunep  
 Grade-9

## Without My Wings

The musical score for "Without My Wings" is written in treble clef with a key signature of one sharp (F#) and a 4/4 time signature. The lyrics are as follows:

I've always dreamed to fly high like an eagle, but always when I would like to  
 touch the sky and free of earthly danger, and so - now - and once I grabbed my feet to jump  
 up on the air but my wings left me a mere and so I could not fly here but  
 I know there's always a chance for me, I know someday I'll be flying  
 high - rising in the sky, coz there's a light that there is - now  
 my head starts that leads me to my goal, a voice keeps saying  
 that I'm not a - ver - y - even with out my wings  
 oh - oh on oh oh - oh on oh oh with out my wings  
 God knows how it hurts me lot when I fall  
 on that pit how do I - call was for me to face the world  
 with out my wings trips but I'm sure my wings  
 will rescue me one day to take me up the sky see take me  
 up the sky see

Written and composed by Grade-9 students (Boys)

## MENTORS' PROSPECTIVE

John Crossby said, "Mentoring is a brain to pick, an ear to listen, and a push in the right direction".

The mentorship adopted in the school is a challenging one, but not without learning between mentors and their mentees. A mentor's awareness of the child's abilities, interests, strengths and weaknesses, provides a backbone for the children to come out of their comfort zone. It helps in maintaining mutual respect, trust and understanding throughout the mentoring process, and it also contributes to a mentee's overall development, which in turn helps the mentor to reflect on one's own career and discover new ways of thinking.

Miss Salangjungla Pongener

AROZEN  
GRADE-9

### DID YOU KNOW?

- You can hear a blue whale's heartbeat from more than 2 miles away.
- Scotland has 421 words for snow.
- Octopuses lay 56,000 eggs at a time.
- That tiny pocket in jeans was designed to store pocket watches.
- The current American flag was designed by a high school student.
- Dogs sniff good smells with their left nostril.
- Bees can sting other bees.
- Some cats are allergic to people.
- Coca-cola was the first soft drink in space.
- Kangaroos cannot walk backwards.
- Fingernails grow faster when you are cold.
- Birds cannot survive in space. They need gravity to be able to swallow.
- The snow on Venus is metal.
- The strawberry is the only fruit that bears seeds on the outside.
- Hedi Lamar was a famous Hollywood film actress who also invented what became modern day Wi-Fi.
